

Attend an October Workshop on Local Implementation of Groundwater Act

A series of three October workshops in Jackson, Wilton and Galt will update Cosumnes Subbasin residents and water users on local implementation of California's new groundwater law, the Sustainable Groundwater Management Act (SGMA).

Each workshop will address the following topics, with time for participants to ask questions and provide input:

- Managing Groundwater – Why Care and What's Required by State Law?
- Developing a Groundwater Sustainability Plan for the Cosumnes Subbasin: Near-Term Efforts and Proposition 1 Grant Scope
- Public Outreach and Engagement Strategies

Amador Workshop

October 12, 6:30-8:00 pm

Amador County Administration Center
- Board Chambers
810 Court Street, Jackson

Mid-County Workshop

October 24, 6:30-8:00

Wilton Community Center
9717 Colony Rd, Wilton

West-County Workshop

Date and location TBA

information.*

WHY ATTEND A WORKSHOP IN THE COSUMNES SUBBASIN?

SGMA mandates that all high and medium priority groundwater basins in California – including the Cosumnes Subbasin - must develop one or more groundwater sustainability plans by 2022 and be managed sustainably over a 20-year implementation period. Given the subbasin's heavy reliance on groundwater, it is important for residents, businesses and interested members of the public to help shape the region's approach to managing this precious resource and ensure there is balance between long-time supply and use. Cooperation and coordination among agencies, landowners, stakeholders and others concerned with groundwater usage in the subbasin is crucial to successful SGMA implementation and to maintaining local control over the subbasin's groundwater resources. In order for SGMA implementation to be responsive to local interest, public involvement and input is key to ensuring a thoughtful, locally driven plan for the Cosumnes Subbasin. Each workshop provides the opportunity to learn more about local SGMA implementation, ask questions, and share what is important to you.

Visit cosumnes.waterforum.org for up-to-date information on groundwater planning in the Cosumnes Subbasin and the opportunity to sign up to receive more information.
