WATER AGENCY

Temporary Construction Water Application - Part A

Parcel #: _____ Permit Number: _____

Hydrant Location (Nearest X-Street): _____ Hydrant Number: _____

Project Address:* _____ City: _____ Zip Code: _____

Nearest Cross Street: _____ Project Name: _____ Start Date: _____

Ending Date: _____ Project Size in Acres: _____ Estimate of Water Usage: _____ (Gallons)

Property Owner:* _____ Contact Name: _____

Mailing Address: _____ City/State/Zip: _____

Phone: _____ Fax: _____ E-mail: _____

Name of Contractor:* _____

Mailing Address: _____ City/State/Zip: _____

Phone: _____ Fax: _____ Contractor's License Number & Classification: _____

Project Managers Name & E-mail: _____

Name of Applicant:* _____

Mailing Address: _____ City/State/Zip: _____

Phone: _____ Fax: _____ E-mail: _____

Name of Accounts Payable:* _____

Mailing Address: _____ City/State/Zip: _____

Phone: _____ Fax: _____ E-mail: _____

Nature of Work:* Residential Housing Development Commercial-Industrial Development Residential Infill
 Commercial-Industrial Infill Other: (Description) _____

If the water truck is not owned by the permit holder, this section not required.

Water Truck Company Name: _____

Mailing Address: _____ City/State/Zip: _____

Phone: _____ Fax: _____ E-mail: _____

Vehicle License or Vehicle I.D. No. _____ Vehicle Make: _____ Model: _____

Permit Types*	Flat Rate	Metered
Flat Rate has a maximum daily usage of 4,500 gal a day. Meter and RP Devices Shall Be Provided by the Contractor.	<input type="checkbox"/> 1-10 Days = \$87.00	<input type="checkbox"/> 1" Monthly = \$28.54 + \$1.24 Per 100 CF
	<input type="checkbox"/> 11-30 Days = \$215.68	<input type="checkbox"/> 3" Monthly = \$105.87 + \$1.24 Per 100 CF
	<input type="checkbox"/>	<input type="checkbox"/> 4" Monthly = \$167.73 + \$1.24 Per 100 CF

Water Meter Information*

Meter Make: _____ Serial No.: _____ Size: _____ Units: _____ Initial Read: _____

RP-Backflow Device Make: _____ Model: _____ Serial No.: _____ Size: _____

Provide Current Test Results: _____

*(Permits cannot be processed without this information).

Temporary Construction Water Application – PART B

Important Notices & Instructions to the Applicant

California State law requires that every permit applicant provide specific information and declarations regarding the proposed work. Please read the information below and follow the directions pertaining to your particular permit application. All applicants must provide the information requested on Permit Application A and B. If you are unsure about any item, the SCWA staff will assist you.

Temporary Construction Water Permit Regulations

It is the Temporary Construction Water permit holder's responsibility to ensure that SCWA's facilities are being operated properly. Below is a breakdown of the infractions SCWA looks for. If SCWA finds you operating the system outside of the guidelines listed below it will result in a fine of **\$370.30 per occurrence**. Make sure you instruct all of your employees of these regulations, there will not be any warnings provided to the permit holder.

1. No person or persons other than employees of the Agency, or authorized members of the appropriate fire department, shall open any fire hydrant or attach any hose or pipe thereto for any purpose without first obtaining written permission from the Sacramento County Water Agency (SCWA).
2. Permit shall be carried in the vehicle drawing water and presented to SCWA employees and Sacramento County Inspectors as proof of permission to use facilities.
3. A metered permit is only valid for the use of one fire hydrant at a time. Vehicles shall draw water only from the designated fire hydrant indicated in this permit; relocating to a different fire hydrant requires notifying SCWA of proposed location in writing (5) days prior to change of location.
4. All possible care shall be exercised to prevent damage to facilities of the Agency involved in furnishing the temporary service. No person shall operate the valve of any fire hydrant in any manner other than by the use of a hydrant wrench designed for that purpose. In case of damage to any Agency facilities, the cost of making repairs shall be paid for by the permit holder. (SCWA Code section 3.40.070, 2010). The permittee shall notify SCWA if the fire hydrant they are using is damaged or fails to completely shut off.
5. All connections to SCWA facilities shall be with an air gap or approved reduced pressure backflow prevention device with a current blue tag, indicating the device has been tested within one year of the test date on the tag.
6. A Metered Construction Water Permit requires the use of a properly operating water meter at all times.
7. While connected to a SCWA fire hydrant the end of hose shall not come in contact with the ground after filling a water tank unless there is an approved reduced pressure backflow prevention device connected to the fire hydrant.
8. An approved reduced pressure backflow preventer is required when using a hose lay greater than 50' and when you attach a nozzle to the end of the hose.
9. At the end of each day the hydrant caps shall be reinstalled when the hydrant is not in use.
10. The SCWA reserves the right to refuse the use of fire hydrants in areas where such use may cause risk to the public or create maintenance problems. The permittee shall cease using water from a fire hydrant at any time upon request of the SCWA.
11. The permittee agrees to pay all service charges bi-monthly within 45 days of invoice. Failure to pay will result in a late fee of **10%** of the amount that has become delinquent plus a penalty of 1½% per month for non-payment of the service charge and late fee until paid.
12. The permittee shall defend, indemnify, and hold harmless the SCWA, its administrators, and employees from and against all claims and/or liabilities for injury to person or persons and/or damage to property resulting from all activities granted under this permit.
13. Failure to comply with any SCWA regulations specifically related to this permit shall be cause for revocation.
14. It is the permit holders responsibility to terminate the permit at the end of the project. This also includes when the job is shut down due to winterization. The contractor is responsible for paying the base rate even if there is no water usage.

I have read and understand the responsibilities as the Temporary Construction Water permit holder.
