DSC Delta Plan Performance Metrics/Targets							T	ı		ľ		ı		1								
Increase Flood Insurance Community Rating System credit points.													х						-			
Decrease in EAD and EAF in the Delta.	Х	Х	Х	х	х	Х	Х	х	Х										 			
Percentage of urban communities in the Delta protected by levees meeting DWR urban flood protection criteria.																						
Percentage of rural Delta islands and tracts protected by levees at or above the Bulletin 192-82/PL 84-99 standard.	х	x	x	х	х	x																
Zero water-delivery interruptions caused by floods or earthquakes in the Delta.	х	х	х	х	х	х										х						
 Delta Tourism Acres of State and federal land accessible to the public for recreation and tourism Length (in linear feet) of shoreline accessible for public recreation 	х	x	x	х	х	х	х											х				
Regional Opportunity Index for People and Place (ROI)							х										х	х	х			
Acres of subsidence reversal and carbon sequestration projects evaluated annually.																						
Farmland in the Delta is preserved and local government general plans maintain land designated for agricultural land use.	х	х	х	X (if cutoff wall)	X (if cutoff wall	X (if cutoff wall													X (if cutoff wall			
DSC Delta Plan - Policy RR P1 Goals (3x3 Targets)																						
Protect existing urban and adjacent areas by providing 200-year flood protection.																						
Protect small communities and critical infrastructure of statewide importance (located outside of urban area).	х	х	х	х	х	х	х	х	х	х	х	х	х	х	х							
Protect agriculture and local working landscapes.	х	х	х	х	х	х	х	х	х	х	х	х	х	х	Х				х			
Protect water quality and water supply conveyance in the Delta, especially levees that protect freshwater aqueducts and the primary channels that carry fresh water through the Delta.	×	X	x	x	x	x										х						
Protect floodwater conveyance in and through the Delta to a level consistent with the SPFC for Project levees.	х	х	х	х																		
Protect cultural, historic, aesthetic, and recreational resources (Delta as Place).	х	х	х	х	х	x																
Protect existing and provide for net enhancement of channel margin habitat.																	х					
Protect existing and provide for net enhancement of floodplain habitat.																	х	<u> </u>	 			
Protect existing and provide for net enhancement of wetlands.																	х					
Delta Conservancy – Delta Public Lands Strategy Goals				I				I		I		l					T ,,					
Protect and enhance desired ecological functions. Demonstrate opportunities and strategies to increase agricultural	х	x	x	х	х	x			х	х	x				х		X		х			
sustainability. Reduce flood risk.	x	x	X	х	x	x	х	х	x	х	x	x	х	x	X							
Protect and enhance Delta water quality and water supply.	x	x	X	х	x	x										х			i			
DPC – Economic Sustainability Plan Goals																						
Improve and maintain all non-project levees to at least the Delta-specific PL 84-99 standard	х	х	х	х																		
Implement Sacramento-San Joaquin Delta Multi-Hazard Coordination Task Force report.																						

	FSRP Management Action Components																					
			Structu	ıral				Non-Structural										Multi-benefit				
	DWR FSRP Sites	LMA Erosion Sites	Fix-in-Place: Courtland	Fix-in-Place: Sacramento River	Fix-in-Place: Snodgrass Slough	Fix-in-Place: Perimeter Levees	Access Road/ Flood Fight Berm	Voluntary Structural Elevation	Improved Emergency Response	Community- and Flood-Risk Based Insurance	Local HMP and Relief Cuts	Public Education and Awareness	Improve FEMA CRS	NFIP Flood Insurance Enhancements	Improved Governance between LMAs/RDs	Enhance Water Supply Reliability and Water Ouality	Eco Enhance	Public Recreation/ Education	Sustainable Agriculture			
Formally identify the Delta region as the geographic basis for integrated response, mutual aid, decision making, and information sharing processes during major floods.														X								
Ensure that future development of infrastructure in the Delta is aligned with economic sustainability strategies. Planning of levee investments must fully consider the economic value of												х	х	X X					х			
infrastructure services along with all other benefits.														^								
Continuing through-Delta conveyance is important to economic sustainability in the Delta and can be consistent with water supply reliability.	х	х	х	х	х	х										х						
Maintain and enhance the value of Delta agriculture.	x	x	x x	X	X	x												х	X			
Limit the loss of productive farmland to urbanization, habitat, and flooding to the greatest practical extent.	^	^	*	^	^	^													^			
Protect Delta water quality and water supplies for agriculture. Support growth in agritourism	х	Х	х	Х	Х	X										х		x	x			
Emphasize strategies with little or no conflict with the Delta economy.																			х			
Tidal marsh habitat plans should be significantly reduced.																						
Increased open-water habitat in the Delta is not recommended.																						
Include recreation facility development in habitat enhancement plans when possible.					х	х	х											х				
Habitat restoration should start on state-owned land and only occur on private lands with willing sellers consistent with local land use plans																	х					
Improve most "lowland" levees and selected other levees to a higher Delta- specific standard that more fully addresses the risks due to earthquakes, extreme floods, and sea-level rise, allows for improved flood fighting and emergency response, provides improved protection for legacy communities, and allows for growth of vegetation on the water side of	x	x	x	х	х	х	х															
levees to improve habitat. Transfer to a regional agency with fee assessment authority on levee														x								
beneficiary's responsibility for allocating funds for the longer-term improvement of Delta levees and the maintenance of regional emergency preparedness, response, and recovery systems developed jointly with the Delta counties and state and federal governments.																						
Provide funding for longer-term levee improvements, provide ongoing funding for regular levee maintenance and expanded emergency preparedness, response, and recovery.														×								
Focus recreation development in five location-based concepts: 1) Enhance Delta Waterways 2) Develop Dispersed Points of Interest and Activity Areas 3) Create Focal Point Destination Complexes with natural areas, parks,				х	х	х	х											х				
Legacy Communities, marinas, historic features, and trails 4) Expand public access to Natural Habitat Areas 5) Create recreation-oriented buffers at Delta urban edges																						
DPC – Land Use and Resource Management Plan Goals/Policies																						
Direct new non-agriculturally oriented non-farmworker residential development within the existing unincorporated towns (Walnut Grove, Clarksburg, Courtland, Hood, Locke, and Ryde).

The rich cultural heritage, strong agricultural/economic base, unique recreational resources, and biological diversity of the Delta shall be preserved and recognized in public/private facilities, such as museums, recreational trails, community parks, farm stands, community centers, and water access facilities within the Delta.				х	х	х	х									х		
Protect the unique character and qualities of the Primary Zone by preserving the cultural heritage, strong agricultural/economic base, unique recreational resources, and biological diversity.							х								x	х х		x
New structures shall be set back from levees and areas that may be needed for future levee expansion consistent with local reclamation district regulations and, upon adoption, with the requirements to be identified in the CVFPP.																		
Preserve and protect the natural resources of the Delta. Promote protection of remnants of riparian and aquatic habitat. Encourage compatibility between agricultural practices and wildlife habitat.																х		
Local governments shall carefully and prudently carry out their responsibilities to regulate new construction within flood hazard areas to protect public health, safety, and welfare. These responsibilities shall be carried out consistent with applicable regulations concerning the Delta, as well as the statutory language contained in the Delta Protection Act of 1992. Increased flood protection shall not result in residential designations or densities beyond those allowed under zoning and general plan designations in place on January 1, 1992, for lands in the Primary Zone.														X				
Support programs for emergency levee repairs and encourage coordination between local, State, and federal governments. The programs may include but are not limited to: interagency agreements and coordination; definition of an emergency; designation of emergency funds; emergency contracting procedures; emergency permitting procedures; and other necessary elements.														X				
Support efforts to address levee encroachments that are detrimental to levee maintenance. Support funding assistance for existing unincorporated towns within the														X				
Delta to improve levees up to a 200-year flood protection level. Support a multi-year funding commitment to maintain and restore both																		
project and non- project levees in the Delta. Seek funding for and support programs to make cost-effective levee investments in order to preserve the economy and character of the Delta.														x				
Support a minimum Delta-specific levee design standard as established by state and federal regulations.	Y	x	×	x	X	Y	x							х		x x		x
Encourage the protection of agricultural areas, recreational resources and sensitive biological habitats, and the reclamation of those areas from the destruction caused by inundation.	^	^	^	^	^	^	^									, x		^
