

Project Update

Elder Creek Phase 4 DRAINAGE IMPROVEMENT PROJECT

JANUARY 2017

ISSUE 1

About this Newsletter

This newsletter provides current information about the Elder Creek Phase 4 Drainage Improvement Project. For your reference, a project exhibit is printed on the back of this newsletter. If you have questions, please contact the project staff listed below.

Background

The proposed project located west of Elk Grove-Florin Road and north of Gerber Road, will implement a portion of the drainage master plan for this developing area of Sacramento County.

The project will improve drainage and flood protection to existing structures and future development in addition to being a component in establishing an open space wetland and wildlife habitat preserve. Similar improvements are currently being constructed upstream of the project area.

Project Description

The existing creek will be widened, deepened, and sections of the alignment shifted along property lines. Subsequently an existing portion of creek will be abandoned and backfilled. See the attached exhibit for details.

Upon completion of channel improvements, areas disturbed by the project will be stabilized for the wet season. Tree planting activities are scheduled to take place the following year in the fall of 2018.

Project Updates

The design is being finalized and the project is scheduled for construction in summer 2017. The project is currently undergoing environmental review and is scheduled to be presented to the Sacramento County Board of Supervisors for approval in March 2017.

A second newsletter will be mailed out to provide an update after public bidding. The newsletter will provide additional contact information for the construction phase of the project.

Project Schedule

- Final Plans & Specifications – February 2017
- Board of Supervisors Approval – March 2017
- Project Advertisement – April 2017
- Bid Opening – May 2017
- Construction Begins – June 2017
- Construction Ends – November 2017
- Tree Planting Project – Fall 2018

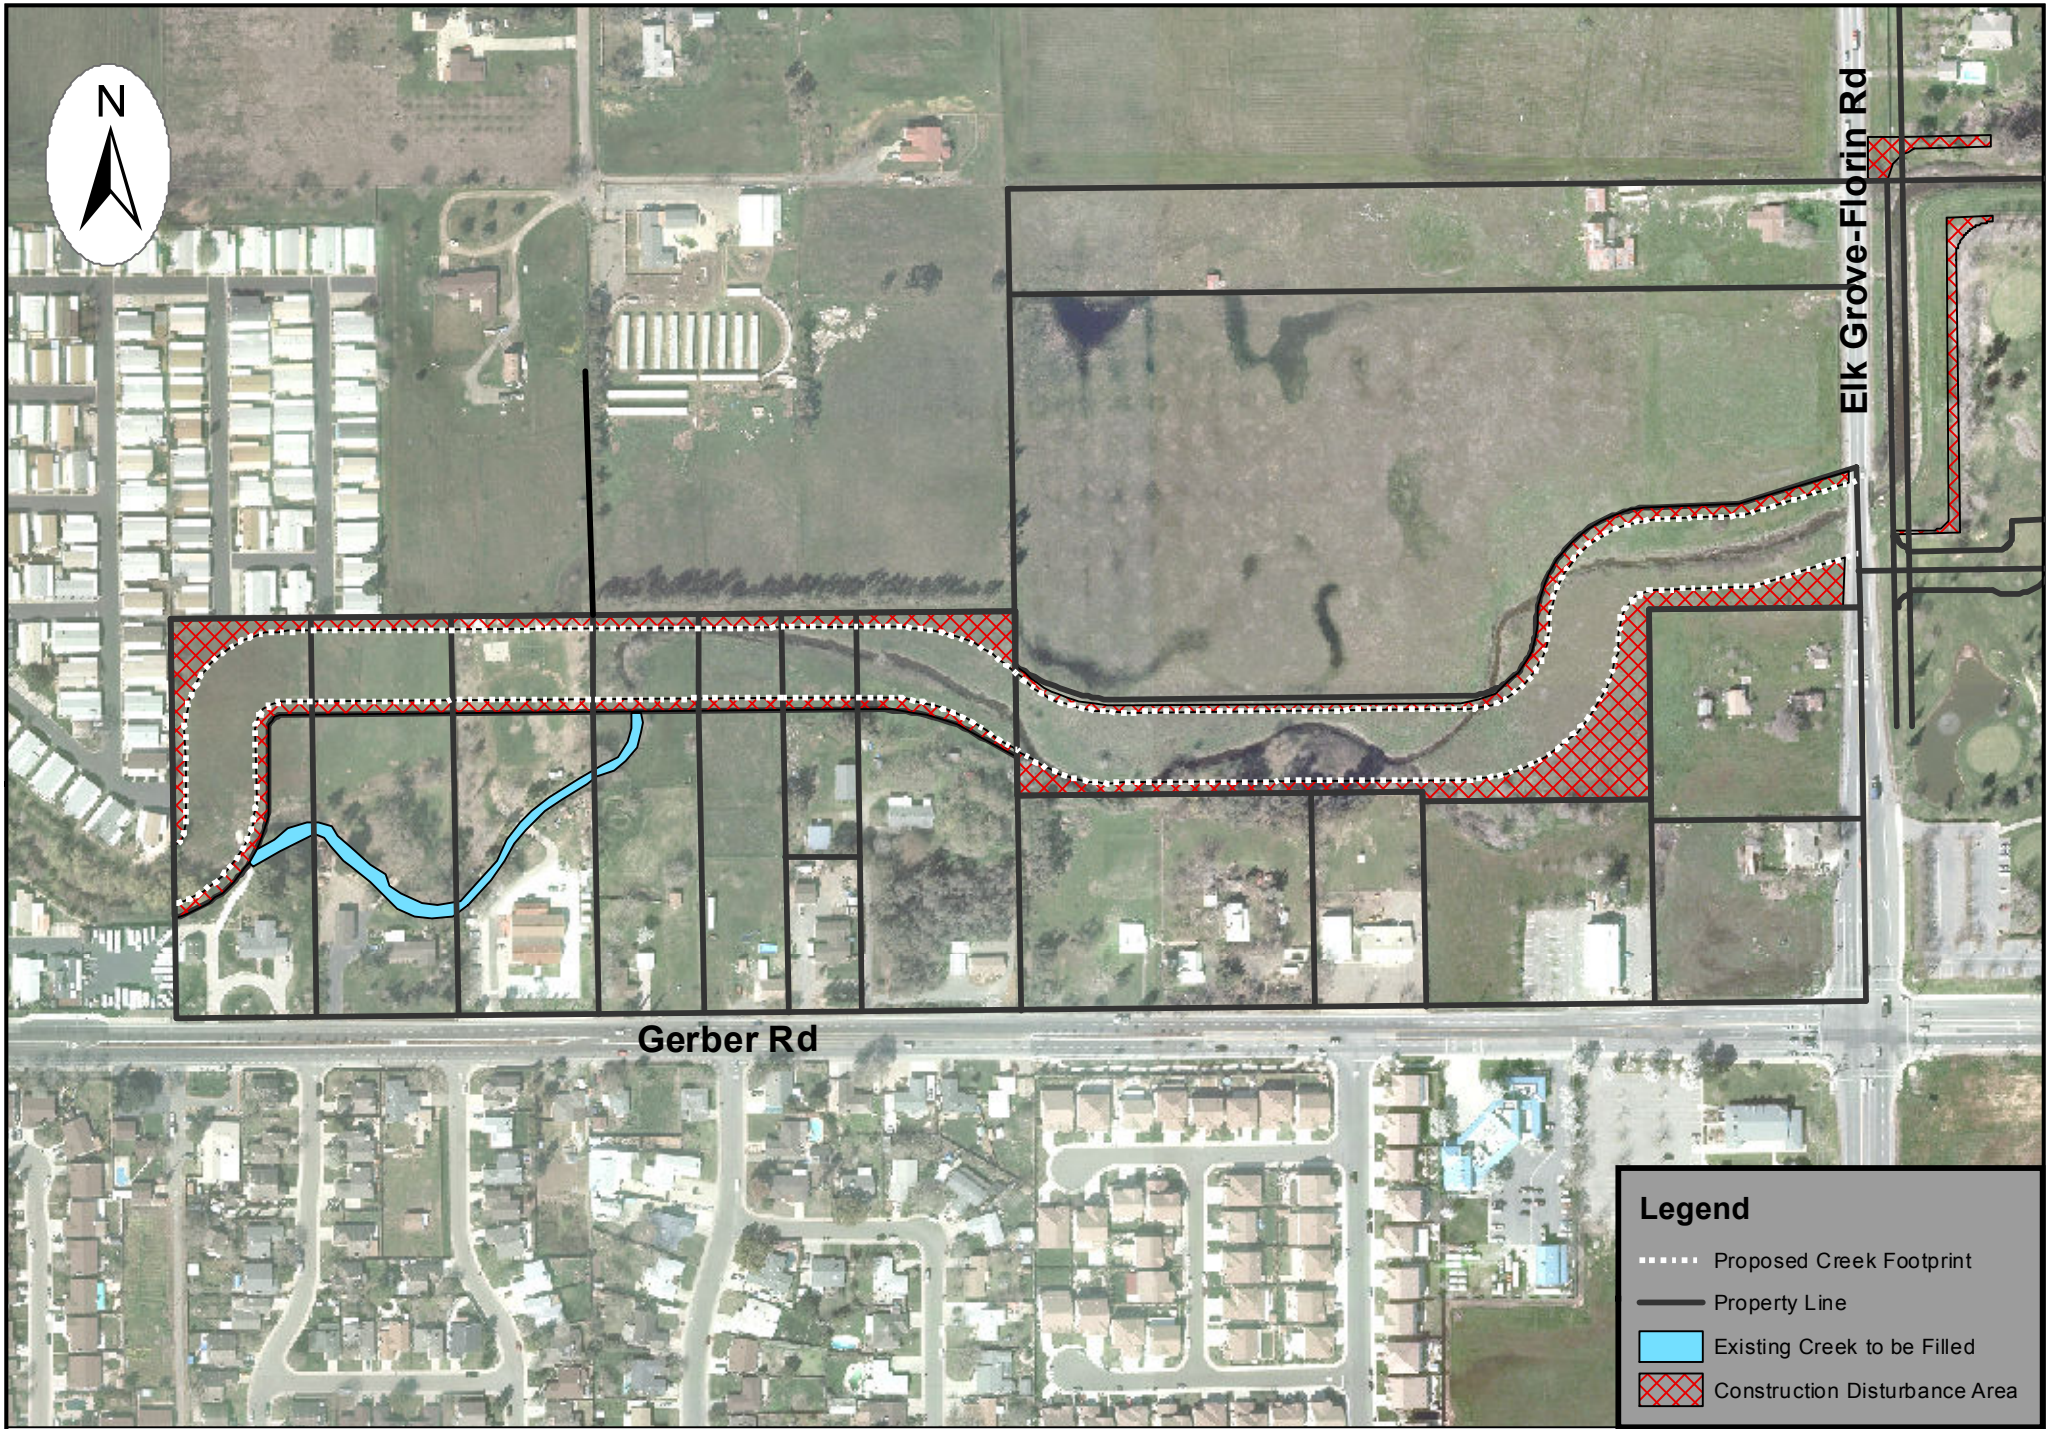

All dates are tentative and subject to change

In addition, project information can be viewed online at www.saccodwr.org: (search: Elder Creek Project).
