

Project Update

Mather Dam IMPROVEMENT PROJECT

JULY 2017

ISSUE 1

About this Newsletter

This newsletter provides current information about the Mather Dam Improvement Project. For your reference, a project exhibit is printed on the back of this newsletter. If you have questions, please contact the project staff listed below.

Background

The project is located at Mather Lake east of Zinfandel Drive and south of Douglas Road in east Sacramento County.

The project will improve the dam to meet State dam safety requirements while maintaining most of the current functionality of the lake.

Description

The project will upgrade the existing dam spillway and earthen embankments. The spillway improvements will upgrade the configuration, lower the spillway elevation by one-and-half (1.5) feet, and add erosion protection to the outfall area to the creek. The embankment improvements will upgrade the existing embankments by replacing and adding material.

Disturbed areas will be hydroseeded at the end of the project.

Updates

The Sacramento County Board of Supervisors approved advertising the project for construction bids on March 21, 2017. The project received nine bids on April 27, 2017. The County awarded the construction contract to the low bidder – Nordic Industries, Inc.

Quality Control

Russel Burch is the construction inspector for the project. He will resolve most field issues and ensure the work meets the design specifications. Quinn Hofmann is the Resident Engineer. He will oversee construction and handle major field issues.

Schedule

- Construction Begins – July 2017
- Construction Ends – October 2017

All dates are tentative and subject to change

In addition, project information can be viewed online at www.saccodwr.org: (search: Mather Dam Project).
