

PROJECT *Update*

Issue No. 7 - January 2021

Phase 2A: Arden Service Area Pipe and Meter Installation Project

Project Updates

As of late December, Teichert began working on restoration activities throughout the project area. Upon SCWA's initial walk through, it was determined that metered boxes and or lids need adjusting. Additionally, other work that remains outstanding includes: striping, survey marker restoration, back-yard valve abandonments, fire hydrant concrete pads and clean up. Notices will be placed on your door if work is expected on your property or where back-yard access is required.

As a reminder, street restoration on American River Drive is tentatively scheduled for the spring of 2021 due to weather restrictions. Orange signs indicating the anticipated timeframe of this work have been placed along American River Drive and will remain until the work is completed.

We thank you for your cooperation throughout this entire project and your patience as we work to complete finishing touches for final restoration.

Project Summary

- Begin Construction – March 2020
- Work to be completed: Striping, minor restoration activities, street restoration on American River Drive
- End Construction – Tentatively March 2021
